

# THE ORANGE AND BLUE.

VOL. I

AUBURN, ALA., WEDNESDAY, NOVEMBER 21, 1894.

NO. 2

## 94 TO 0.

### IT WAS TOO ONE SIDED TO BE INTERESTING.

Worse Than The Cyclone That Struck  
The Democrats, Was The Tornado  
That Mowed Down The Techs.

The Techs had no need to ask at the end of Saturday's game: "Where are we at?" It was perfectly obvious that they were not "in it." They played pretty good ball, but they should not have tackled Auburn.

The boys here could hardly believe it when they received a telegram stating the result of the game to be 94 to 0. We certainly did not expect to lose, but we did expect a little opposition, and found none. We had everything our own way from start to finish, and spent the time in making touch-downs and in kicking goals.

About 500 people witnessed the game. Our team played almost perfect ball, and there were many brilliant individual plays on both sides. Especially did our men show up well in their interference. The interest of the game lay in seeing how big a score we could make and how near to making a touch-down the Techs could come.

#### ONE THING

That impressed us was the gentlemanly way in which everything happened, and the pluck shown by our opponents, in continuing the game to the bitter end with a very forlorn hope of making one touch-down. It is always gratifying to play a game with such a team, no matter how unequal the contest. We have been fortunate this year in meeting in our first two contests with gentlemen and not toughs. Oh, that it might continue! The manager of the Techs came down previous to the game to see Manager Riggs as to whom they could play, not wishing to run in any one not a legitimate Tech without our consent. They played square ball and we honor them for it.

#### THE GAME

Need not be given in detail. It would be monotonous. The Techs did not succeed in getting the ball nearer our goal line than thirty yards. We made sixteen touch-downs and kicked fifteen goals. One attempt was made to kick a goal from the field, but owing to the unevenness of the ground, it failed.

During the game two Techs, Forrest and Camp, were obliged to quit the game, one from exhaustion, the other being "banged up" and worn out. Towards the close our substitutes were put in merely to give them a seasoning.

As far as we know the largest score ever made in a foot-ball game was made by the U. of Va. against the U. S. Naval Reserve, it being 102 to 0. Our score stands second to that.

Umpire, Park Howell; Referee, Dorsey, our Dorsey of the team of '93 Lineman, E. A. Werner, '93 Techs.

### THE WEBSTERIAN SOCIETY.

The first meeting of 1894-5 was held Saturday night, Sept. 15. Mr. Chambers, '95 presided, Mr. King, C. L., '96, being secretary. About 25 old men were present and much interest was manifested. Messrs Wren, McGehee, Ayres and Vines were initiated. There being no regular business on hand the "old stand-by's" favored the Society with extemporaneous remarks. A subject was chosen for the next meeting and 3 declaimers being appointed, the Society adjourned.

Sept. 22.—Chambers, President and King, Secretary. Messrs. Shanks, Alford, Giddens, Hare, Webb and Wright, C. O. were initiated. The debate on the subject:—Resolved, That the works of Art afford mankind more pleasure than the works of Nature, was warmly contested and decided in favor of the Negative. Molder did himself great credit on this debate. Nearly all took part, the principal participants being King, C., King, D., Webb, Wilson, B., of the Affirmative and Molder, Tippin and Taylor, B., of the Negative.

Sept. 29.—Mr. H. V. Jackson initiated, a most valuable acquisition. Prof. Thach gave the Society a pleasing and instructive address on society work. On account of pressure of business no debate was held. A committee from the Wirts was received and the ORANGE AND BLUE put on foot. The election for the Thanksgiving debate came off with the following result: President, McMillan; Sec., Taylor, B. Debaters, Molder and Chambers. Committee, King, C., Wilson and Hare.

Oct. 13.—Messrs. Gonce and Kline were initiated. King, Molder and Taylor made excellent declamations. The subject, Resolved, That Women

should have equal suffrage with Men, was debated with a great deal of credit to both sides, the decision being rendered in favor of the Negative. The editors of the paper were elected. McMillan resigned the presidency of the coming debate; also his position of associate editor of our paper. The regular monthly election was held with the following result: Pres., Chambers; V. Pres., Tippin; Sec., Wilson, B. H.

Oct. 20.—Hare and Shanks rendered well prepared declamations. The subject debated was: Resolved, That the South was justified in seceding from the Union. Webb, Tippin, Pevey and Weathers upheld the Affirmative, while Jackson, Taylor, B., Hare and Molder defended the Negative. The question was decided in favor of the Aff., after an exciting contest. Pevey was elected in McMillan's place as associate editor. Chambers resigned as Thanksgiving debater, and was elected as president of debate in place of McMillan, resigned: Taylor, B. elected as debater.

The last three meetings were not largely attended on account of the usual November atmosphere but "scrub" debates were held and much pleasure and benefit derived there from.

The Societies are not now receiving that support from the higher classes that they formerly enjoyed. It is hoped that the seniors and juniors will correct this and set a good example for the lower classes. After the "season" is over we desire to see a large majority of the students connected with one or the other Societies.

The usual demonstrations followed the news of our victory Saturday night. "Boys will be boys," and when we come to think, we conclude that it is best not to have too old a head on young shoulders. Crackers, tin horns, and bon fires were in order. The faculty also shared in our joys, and to some extent participated in our demonstrations. We have been informed that one of their number carried the college drums to his room and kept them there all night.

One of our faculty has been developing his musical talent of late.

Prof. of Math. (in faculty meeting): Ah-h-hem, how is Mr. D-r-h-m getting along?

Prof. of History: Bully. Getting there by strong IV's and might.

### HURRAH FOR THE SOPHS!

On Saturday afternoon the "Sophomore Blues" played the "Junior Greens" on the Campus, as per announcement on the bulletin board. This was the second game between these two elevens. The first resulted in a tie, the score being 6 to 6, having been played on the 10th.

Last Saturday's game was very interesting, enthusiasm on both sides being high, but we are glad to say that betting was "exhibited" on account of the proclamation of the management.

The "Blues" had decidedly the lightest team, but seemed to have their interference down to a better point, and to have been better trained than the "Greens." Lack of space does not permit us to give the game in detail nor to mention the many star features. The score was 12 to 0 in favor of the "Blues."

Umpire, Peevey; Referee, Wills, W. D.

For the proper study of curves in all their various positions, magnitudes, etc., the students are respectfully requested to observe the gyrations of the young professors (old ones too) as they cheer the 'varsity or the scrub team on to victory at the afternoon practice and more especially, if a thorough knowledge of the subject is desired, follow their movements with pen and paper when a certain well known voice cries out, "Come on, Harry."

Several students under the direction of Mr. W. M. Riggs have formed a Glee-Club and much talent is enlisted. It is thought that a schedule of dates will be arranged and that the Club will visit points in this state. It is said to be in the interest of the foot-ball team.

Can he bear it? Murder will out. From the classic shades of distant Athens comes the startling information that our honored president, the man revered of all, has for these many years been sailing under the wrong flag. He knowingly allowed his name to be changed and the present owner of "Tut," or on special occasions, "Tut, Tut," now returns and assumes the name of his youth, "Little Bruin." So it W. L. B.

SUBSCRIPTION	\$1 PER SESSION.

We will be glad to receive the subscriptions of all the Alumni and friends of the College receiving a copy of this issue.

On the organization of the Ala. Veterinary Medical Association in Montgomery last Tuesday week, Dr. Cary, Prof. of Vet. Science and Physiology was elected its first president. This is a well deserved honor for the Doctor and we are confident that the new association will prosper under his direction.

Mrs. F. H. Hill, wife of our popular depot agent, and Mrs. Carr on Main street, are both very ill and have just been considered out of danger. We hope for their speedy recovery. We call special attention to this fact and trust that the students will keep this in mind when celebrating our victories. To Auburn boys other words are superfluous.

Gov. Jones says in his message to the Legislature, "The reports of the trustees of the A. & M. College show that this institution is in a prosperous condition and doing excellent work for the State, especially in the department of technical education, for which it is so well fitted. It is a great ornament to Alabama and its excellence has attracted attention in foreign countries as well as our own."

And the tale never ends.

The first resolution adopted in the Senate of Alabama for the present session was in regard to our own beloved College. It was offered by Mr. Hundly and is as follows:—Resolved, by the Senate, That the thanks of the Senate are hereby tendered the students of the Manual Training Department of the Agricultural and Mechanical College for the beautiful gavel which, through the Governor, they

have just presented to the Senate.  
MESSAGE OF THE GOVERNOR.

Montgomery, Nov. 14, 1894.

HON. J. C. COMPTON, Pres. of Senate.

Dear Sir:—I have the honor to herewith transmit a gavel made of Alabama walnut and cedar by the students in the Manual Training Department of the Agricultural and Mechanical College. They desire that it be presented to you for the use of yourself and successors in your high office.

May this gavel never fall into hands less worthy than yours, and may it always be a reminder to the Senate that the youth of the land watch their labors with solicitude and hopeful pride.

THOS. G. JONES.

Two gavels were presented to the Legislature—one to the Senate the other to the House. They were made by Byrum and Hammack, class '97, and are models of workmanship.

An Historical Sketch of the University of Georgia has just been issued. It is written by a graduate, Mr. A. H. Hull, son of a former professor of Mathematics in the University. It is well illustrated and contains an exhaustive as well as a pleasing description of the workings of this great institution, from the time of its foundation away back in the times of Washington. This book will be hailed with delight by graduates, students and sympathizers. Traditions, jokes and college-lore are struck off in a captivating manner. The number of prominent men turned out by this university is truly astonishing. The Historical Sketch no doubt fills a "long-felt want." Would that our own institution possessed such a history!

JAMES WILLIAM MORGAN, JR.

It was with pain that we learned of the death of Prof. J. W. Morgan, Jr., '87, of Florence, Ala., which occurred on the 17th of Sept. He was born near Florence on Aug. 12, 1866; graduated at the age of sixteen from the Normal College in 1884, and in Sept. of this year entered the A. & M. College, junior class. He taught the Montgomery School the next session, returning to Auburn where he graduated with highest honors in 1887.

From 1887-9 he was Prof. of Math. at the Troy Normal College, was principal of Capitol Hill school, Montgomery, for one year, resigning in 1891 to become Supt. of the Florence schools and a year later Professor of Latin and History at the Florence Normal College, which position he held at the time of his death. He was a power, a leader in all that he undertook, whether educational, commercial or

in Christian work. He was Capt. of the Wheeler Rifles, Pres. Y. M. C. A., Pres. Alumni Society of the State Normal College, Chairman of the State Educational Association, a valued member of the Executive Committee of the Merchant's Bank, Supt. of the Sunday School, an Elder in the Presbyterian church, prominent lecturer to Summer institutes, etc., etc. In June 1894 he delivered the address before the Alumni Society of the A. & M. College. And yet only 28 years of age.

Morgan was one of the most brilliant students that ever attended the College and his record in scholarship has never been reached. As a Christian gentleman few were his equal. Modest, though independent, clear, collected and forcible in his speech, a fixedness of purpose in his being that brooked no idle words, yet with an irresistible atmosphere of friendship about him, Morgan stands unrivalled as an example of true, noble manhood. His very presence was argument itself and no one could experience his company without being benefited therefrom.

Prof. Morgan was married on July 11, 1893, to Miss Mary Bayless, a most lovely lady of Florence. His sad death leaves her a widow, and his stricken parents bereft of a son who was a pride and a joy. They have our poor consolation and sympathies.

He is gone. When comes another like him? Shall not our young men who knew Morgan gather inspiration from his pure, noble life, and letting his spirit live within us, try to live better, more useful lives?

The "Sewanee Purple" says that their foot ball manager seems to have been frightened by the enormous crowd that turned out at the Vanderbilt game in Louisville, and regrets that his fright did not seize him "in time to make a date with Auburn." If the Tuscaloosa-Sewanee game had not turned out as it did we would regret it also. As it is we'll wait until after the Auburn-Tuscaloosa game to regret it, and even then there will be no regret. Sewanee doesn't seem to be very far "in it" this season.

We call the attention of those interested to the fact that subscriptions are now due. The Business Manager may be seen at almost any place, and at any time. He is never backward about receiving your dollar. We are not supplied with a surplus, and so can't run our paper for sympathy. Cash is needed. We hope ALL will be prompt in paying up. This includes you.

We would be glad to receive communications from all who have them. Anything of interest and appropriate will be welcomed. Especially would we like the students to contribute. If it is only a spicy joke, let us have it.

When the trustees established the ten scholarships at the last Commencement they conferred a great benefit upon the youth of the State. One student from each Congressional district is appointed by the trustee residing in that district and one from the state at large is appointed by the Governor and Supt. of Education. These scholarships are good for one year and are worth \$100, the holder to pursue an Agricultural Course and to render service on the farm for a specified time each week. But as well as this may be we have been out done, hands down. The University of Alabama, never to be surpassed and not deigning to put herself in line with a movement compared at all with an Agricultural Scholarship of a "Blacksmith and Farmer's" College, has "gone up higher" and beyond the realm of these earthly things and suddenly emerges into the resplendent light of centuries hence with the establishment of ATHLETIC SCHOLARSHIPS—the number depending on the vacant or weak places on the foot-ball team. Holy Moses! Where are they at! But we have reason to believe that these athletic scholarships were not established by the trustees; but we do know that there are men on the University team who are there for no other reason than for pecuniary emoluments and who advertise themselves as beneficiaries of the athletic scholarships. And yet Tuscaloosa beat Sewanee fairly and hopes to beat Auburn fairly! How generous they are about shelling out their fair-ness! Tuscaloosa has no athletic scholarships. This matter should be sifted by those in authority.

OPELIKA AND AUBURN

Monday and Tuesday in Auburn. Rest of the week in Opelika.

## LOCAL AND PERSONAL.

Miss Mamie George Linn was in Montgomery last week taking in the Exposition.

"Among the Breakers" was the last entertainment given by the Auburn theatrical genius under the management of Mesdames Mell and Wilmore and for the benefit of the Episcopal church. The following was the cast of characters:

David Murray, Light-house keeper, B. B. Haralson.

Larry Divine, His assistant, L. W. Payne.

Hon. Bruce Hunter, H. H. Peevey. Clarence Hunter, His word, G. P. Pondurant.

Peter Paragraph, A reporter, P. H. Smith.

Scud, Hunter's colored servant, R. L. Coudling.

Miss Minnie Doze, Hunter's niece, Miss Estelle Whitaker.

Bess Starbright, Cast up by the waves, Hallie Whitaker.

"Mother Cary," A reputed fortune-teller, Bessie Broun.

Biddy Bean, An Irish girl, A. Reese.

All acted their parts unusually well, and, without doubt, it was the greatest success in the way of an amateur performance Auburn has had in a long time.

One of the cleaverest men that we know any where is our depot agent Mr. F. H. Hill. Genial, good hearted, and accommodating, he is always ready to do some act of kindness to those with whom he comes in contact. By his kindly and gentlemanly dealing with men he merits and has gained the esteem and friendship of all who know him.

Who will be our next mayor and city council? Also our chief of police? The fates direct, and let us have good men, always.

Most all the "rats" have donned their uniforms. What a pleasure it is to draw on, for the first time, a suit of grey ornamented with brass buttons.

P. Vines and Kahn D. are a pair of our honored "rats."

Miss Tallulah Gachet left last Saturday for New Orleans, where she will spend several days.

It is amusing to read some of the letters received by the college boys from their little brothers at home. The following is the translation of a barbed-wire-fence looking manuscript hidden in an envelop and received by a cadet the other day:

DEAR BUBBER-

I will write you a few lines. Papa and myself went in the country about a week ago. went out to see Mr. Henderson and he is now gone to hunting.

Neb laid down on one of her puppies about two weeks ago. I have moved her bed in the garden and she likes it very much. and the pupies have their eyes open now. Therefore, Old Dick is dead and I will have to get me a nother ruster. One of our pigs was sick and he died last Sunday. We killed one of them yistidy, and Jony left the door open and Neb got the backbone. We had a good rain yistidy didn't yoall!

I am sorry that I didn't write any sooner so I haven't much to say. and I will close. I will have to go and feed. Good night, Tommie.

Why can Auburn not have a brass band? There is abundance of musical talent in college, but no one seems to have ever had an idea of organizing a band. A first class brass band, such as we might have, would be something of which we would be justly proud.

The circus again next Friday at Notalulga!

The success we are going to have in the football line from this out is to a great extent due to the patriotism of the ladies of the town. They always come out in the afternoons and cheer on the workers with a zeal that knows no limits. What an impetus to hard playing and diligent work is the encouragement and applause of such fair coaches!

New words are coined and old ones pass away. "Riden-the-sick" is only in our memories. Naught but tradition remains of the grand prey.

R. H. Thach, Esq., of Birmingham, a graduate of the college, was in the city last week visiting his brother Prof. C. C. Thach

Dr. Broun and Profs. Mell and Wilmore left last week for Washinton, where they attended the Association of the Agricultural and Mechanical Colleges of the United States. Prof. Wilmore had a paper to read before the Association.

Miss Carrie Howkins, of Hurtsborough, is visiting Miss Sallie Boykin on College Street.

Miss Lela Phillips of Opelika visited Misses Willie Little and Emily Kline on Gay Street last week.

John D. Mell Esq., of Athens, Ga., was over on a visit to his brother Prof. P. H. Mell last week.

Mrs. Gachet and daughter, Miss Tallulah and Mrs. Ella Lupton made a flying trip the Exposition Monday of last week.

The many friends and admirers of Miss Lula Bondurant gladly welcome her back from a long and pleasant stay at her old home in Virginia. She was accompanied on her return by two young lady friends, Misses Eliza

sbeth McCulloch and Chloe Nowline, also of Virginia, who will remain with her some time.

And the grading on the campus continues. How long before it will be finished?

Miss Sallie Andrews, who has made many friends here, is now spending her time very pleasantly between Selma and Montgomery. Holly, we are now certain, is ever green.

Doan(cher) never see him going down the Lane now? No; stays there all the time.

Padding and paddles are now the respective weapons of corporal aspirants and the college villians.

A certain noble young fellow in the Agricultural course has certainly become enamoured with a certain young lady of a certain street in Auburn. Col. B. we call your attention to the Sam(e) for, by gads, he might get into trouble.

Cadet Carden has resigned and returned home.

We sympathize with Cadet Phipps '95, in the loss of his brother who died in Columbus a week ago.

Cadet Askew '95 has returned from a two week's stay in Texas where he went to visit his brother, who is yet very ill.

W. D. Taylor has our heartfelt sympathy. His many friends regretted exceedingly his having had to resign owing to the death of his father at Huntsville last week. Douglas was in the Junior class, and gave promise to leading his Course.

L. W. Payne, the assistant Librarian, lectured to the students of Prof. Petrie's History class, on the 8th inst. His subject was James Anthony Froude, the great English historian. All who heard the lecture were well pleased and went away impressed with the idea that there is often pleasure in Payne.

For full information in regard to the late disastrous wreck on the Western of Ala., in which a "magnificent Pullman palace car was providentially entangled in the net-work of the demolished bridge and would later have to be disengaged by the use of dynamite," please call on Dr. P.

## ALUMNI PERSONALS.

W. E. Richards, '92, M. S. and Tutor in Biology '93, of Oak Bowery, Ala., is practicing law in Weatherford, Texas.

R. F. Hare, of Auburn, class '92 and M. S. and Tutor in Chemistry '93 is Asst. Chemist at the State College of New Mexico.

C. A. Brown, '92, C. E. and Tutor in Civil Engineering '93, is Prof. of Nat. Philosophy in the Public Schools

of Birmingham.

R. J. Trammell, of Opelika, '92 C. E. and Asst. in Mechanic Arts '93 and '94, is 1st Asst. in the Wood-work Dept. Mechanic Arts, Auburn.

E. B. Smith, '92 and M. S. and Tutor '93, is in the drug business at Phenix City, Ala. We hear that "Brutus" has lately taken unto himself a wife.

J. F. Webb, Kellyton, '93 and M. S. and Tutor '94, is Principal of a large school at Heflin, Cleburne Co., Ala. He is certainly one of Auburn's representative men.

A. L. Jones, '92, of Montgomery, is in the insurance business with his father. He has a brother here in College who bids fair to eclipse his splendid record.

P. H. Moore '94 of Blount Springs, is Commandant and Prof. of Mathematics at Springlake College, Springville, Ala. This place was held last year by Crump '93.

R. W. Greene, '92, of Opelika, spent two years since graduation in the Divinity Department of Vanderbilt University. He is teaching in the public school at Notasulga.

W. B. Clay, '92 formerly of Montgomery, is in the grocery business in Sanford, Fla., under the firm name of Clay & Doyle. Clay was married some time ago but we are ignorant of the facts.

G. S. Clark, '92 of Snowdown, Ala., C. E. and Tutor '93, in Asst. Prof. of Civil Engineering at the University of the South, Sewanee, Tenn. "Parson" has by no means a little interest in Auburn.

W. F. Feagin, '92, Clayton, Ala. M. E. and Tutor '93, is Prof. of Agriculture in the N. E. Agricultural School at Albertville, Ala. "Billy" was one of the most popular men in his class, holding its presidency and latter was manager of the football team and of the College Index.

W. M. Riggs, '93, E. & M. E. and Tutor '94, of Orangeburg, S. C., is Asst. in Physics at Auburn. He spent the summer at Cornell in the Physical Laboratories. He is manager of the foot-ball team and is also holding down his old place on the left end. He is taking an advanced course in electricity.

C. C. Johnson, '91, C. E. Tutor in Mathematics '92, of Goodwater, Ala., after teaching a year at his home in connection with his father's admirable school, taught one year in the Indian Schools of Indian Territory. He is now filling with great satisfaction the chair of Mathematics in one of the large schools of Sherman, Tex. "Old Mucket" has a firm hold in the hearts of the old boys and Auburnites.

## LOCAL AND PERSONAL

Miss Mamie George Linn was in Montgomery last week taking in the Exposition.

"Among the Breakers" was the last entertainment given by the Auburn theatrical genius under the management of Mesdames Mell and Wilmore and for the benefit of the Episcopal church. The following was the cast of characters:

David Murray, Light-house keeper, B. B. Haralson.

Larry Divine, His assistant, L. W. Payne.

Hon. Bruce Hunter, H. H. Peevey. Clarence Hunter, His word, G. P. Bondurant.

Peter Paragraph, A reporter, P. H. Smith.

Scud, Hunter's colored servant, R. I. Coudling.

Miss Minnie Doze, Hunter's niece, Miss Estelle Whitaker.

Bess Starbright, Cast up by the waves, Hallie Whitaker.

"Mother Cary," A reputed fortune-teller, Bessie Broun.

Biddy Bean, An Irish girl, A. Reese.

All acted their parts unusually well, and, without doubt, it was the greatest success in the way of an amateur performance Auburn has had in a long time.

One of the cleaverest men that we know any where is our depot agent Mr. F. H. Hill. Genial, good hearted, and accommodating, he is always ready to do some act of kindness to those with whom he comes in contact. By his kindly and gentlemanly dealing with men he merits and has gained the esteem and friendship of all who know him.

Who will be our next mayor and city council? Also our chief of police? The fates direct, and let us have good men, always.

Most all the "rats" have donned their uniforms. What a pleasure it is to draw on, for the first time, a suit of grey ornamented with brass buttons.

P. Vines and Kahn D. are a pair of our honored "rats."

Miss Tallulah Gachet left last Saturday for New Orleans, where she will spend several days.

It is amusing to read some of the letters received by the college boys from their little brothers at home. The following is the translation of a

barbed-wire-fence looking manuscript hidden in an envelop and received by a cadet the other day:

DEAR BUBBER-

I will write you a few lines. Papa and myself went in the country about a week ago. went out to see Mr. Henderson and he is now gone to hunting.

Neb laid down on one of her puppies about two weeks ago. I have moved her bed in the garden and she likes it very much, and the pupies have their eyes open now. Therefore, Old Dick is dead and I will have to get me a nother rustur. One of our pigs was sick and he died last Sunday. We killed one of them yistidy, and Jony left the door open and Neb got the backbone. We had a good rain yistidy didn't yoall!

I am sorry that I didn't write any sooner so I haven't much to say. and I will close. I will have to go and feed. Good night, Tommie.

Why can Auburn not have a brass band? There is abundance of musical talent in college, but no one seems to have ever had an idea of organizing a band. A first class brass band, such as we might have, would be something of which we would be justly proud.

The circus again next Friday at Notalulga!

The success we are going to have in the football line from this out is to a great extent due to the patriotism of the ladies of the town. They always come out in the afternoons and cheer on the workers with a zeal that knows no limits. What an impetus to hard playing and diligent work is the encouragement and applause of such fair coachers!

New words are coined and old ones pass away. "Riden-the-sick" is only in our memories. Naught but tradition remains of the grand prey.

R. H. Thach, Esq., of Birmingham, a graduate of the college, was in the city last week visiting his brother Prof. C. C. Thach

Dr. Broun and Profs. Mell and Wilmore left last week for Washinton where they attended the Association of the Agricultural and Mechanical Colleges of the United States. Prof. Wilmore had a paper to read before the Association.

Miss Carrie Hawkins, of Hurtsborough, is visiting Miss Sallie Boykin on College Street.

Miss Lela Phillips of Opelika visited Misses Willie Little and Emily Kline on Gay Street last week.

John D. Mell Esq., of Athens, Ga., was over on a visit to his brother Prof. P. H. Mell last week.

Mrs. Gachet and daughter, Miss Tallulah and Miss Ella Linton made

a flying trip the Exposition Monday of last week.

The many friends and admirers of Miss Lula Bondurant gladly welcome her back from a long and pleasant stay at her old home in Virginia. She was accompanied on her return by two young lady friends, Misses Eliz-

sbeth McCulloch and Chloe Nowline, also of Virginia, who will remain with her some time.

And the grading on the campus continues. How long before it will be finished?

Miss Sallie Andrews, who has made many friends here, is now spending her time very pleasantly between Selma and Montgomery. Holly, we are now certain, is ever green.

Doan(cher) never see him going down the Lane now? No; stays there all the time.

Padding and paddles are now the respective weapons of corporal aspirants and the college villains.

A certain noble young fellow in the Agricultural course has certainly become enamoured with a certain young lady of a certain street in Auburn. Col. B. we call your attention to the Sam(e) for, by gads, he might get into trouble.

Cadet Carden has resigned and returned home.

We sympathize with Cadet Phipps '95, in the loss of his brother who died in Columbus a week ago.

Cadet Askew '95 has returned from a two week's stay in Texas where he went to visit his brother, who is yet very ill.

W. D. Taylor has our heartfelt sympathy. His many friends regretted exceedingly his having had to resign owing to the death of his father at Huntsville last week. Douglas was in the Junior class, and gave promise to leading his Course.

L. W. Payne, the assistant Librarian, lectured to the students of Prof. Petrie's History class, on the 8th inst. His subject was James Anthony Fronde, the great English historian. All who heard the lecture were well pleased and went away impressed with the idea that there is often pleasure in Payne.

For full information in regard to the late disastrous wreck on the Western of Ala., in which a "magnificent Pullman palace car was providentially entangled in the net-work of the demolished bridge and would later have to be disengaged by the use of dynamite," please call on Dr. P.

## ALUMNI PERSONALS.

W. E. Richards, '92, M. S. and Tutor in Biology '93, of Oak Bowery, Texas.

R. F. Hare, of Auburn, class '92 and M. S. and Tutor in Chemistry '93 is Asst. Chemist at the State College of New Mexico.

C. A. Brown, '92, C. E. and Tutor in Civil Engineering '93, is Prof. of Nat. Philosophy in the Public Schools

of Birmingham.

R. J. Trammell, of Opelika, '92 C. E. and Asst. in Mechanic Arts '93 and '94, is 1st Asst. in the Wood-work Dept. Mechanic Arts, Auburn.

E. B. Smith, '92 and M. S. and Tutor '93, is in the drug business at Phenix City, Ala. We hear that "Brutus" has lately taken unto himself a wife.

J. F. Webb, Kellyton, '93 and M. S. and Tutor '94, is Principal of a large school at Heflin, Cleburne Co., Ala. He is certainly one of Auburn's representative men.

A. L. Jones, '92, of Montgomery, is in the insurance business with his father. He has a brother here in College who bids fair to eclipse his splendid record.

P. H. Moore, '94 of Blount Springs, is Commandant and Prof. of Mathematics at Springlake College, Springville, Ala. This place was held last year by Crump, '93.

R. W. Greene, '92, of Opelika, spent two years since graduation in the Divinity Department of Vanderbilt University. He is teaching in the public school at Notasulga.

W. B. Clay, '92 formerly of Montgomery, is in the grocery business in Sanford, Fla., under the firm name of Clay & Doyle. Clay was married some time ago but we are ignorant of the facts.

G. S. Clark, '92 of Snowdown, Ala., C. E. and Tutor '93, in Asst. Prof. of Civil Engineering at the University of the South, Sewanee, Tenn. "Parson" has by no means a little interest in Auburn.

W. F. Feagin, '92, Clayton, Ala. M. E. and Tutor '93, is Prof. of Agriculture in the N. E. Agricultural School at Albertville, Ala. "Billy" was one of the most popular men in his class, holding its presidency and latter was manager of the football team and of the College Index.

W. M. Riggs, '93, E. & M. E. and Tutor '94, of Orangeburg, S. C., is Asst. in Physics at Auburn. He spent the summer at Cornell in the Physical Laboratories. He is manager of the foot-ball team and is also holding down his old place on the left end. He is taking an advanced course in electricity.

C. C. Johnson, '91, C. E. Tutor in Mathematics '92, of Goodwater, Ala.,

after teaching a year at his home in connection with his father's admirable school, taught one year in the Indian Schools of Indian Territory. He is now filling with great satisfaction the chair of Mathematics in one of the large schools of Sherman, Tex. "Old Mucket" has a firm hold in the hearts of the old boys and Auburnites.

# THE POYTECHNIC INSTITUTE EXHIBIT.

The exhibit of Polytechnic Institute at the Southern Exposition in Montgomery is the most extensive and varied that the Institute has ever made. It occupies the entire end of the main building, and has been very artistically arranged by Dr. Cary who is in charge, assisted by Messrs. Trammell and Hammack.

Commencing at the right, the first department is that of Mechanics. In this the most noticeable exhibits are, a ten horse power steam engine made by the students, and student work illustrating the course of instruction in wood work, forging and machine work. Some of the work in ornamental turning is very beautiful, showing both taste and workmanship. The next exhibit is that of the department of Electrical Engineering. This contains a dynamo made by the students which has been in use for some time, furnishing the power to run the cotton gin, thresher and other farm machinery at the experiment station. It also contains many other specimens of student work and of instruments used in the Electrical Laboratory.

The next exhibit is that of the Department of Civil Engineering. It contains several sets of instruments, and some very fine models of bridges now in use on prominent railroads. But the most attractive feature is the beautiful drawings, very handsomely mounted. These drawings are student work in Architecture, Mechanical and Machine drawing as well as in Civil Engineering. They illustrate the course in drawing, and the method of instruction. Many of them were on exhibition at the World's Fair at Chicago, and attracted much notice and commendation. Suspended from the walls is the diploma and the medal awarded for the exhibit made at the Paris Exposition. This exhibit has been highly complimented by Engineers and other competent judges

The central exhibit is in an alcove in which are a set of German Models illustrating descriptive Geometry and a large number of Photographs of the Collegebuildings, laboratories, apparatus, etc., the football teams, and the Faculty. The photographs are so arranged as to give a very pleasing effect, as well as to furnish much information as to facilities of the College for instruction. This alcove is always thronged with interested visitors.

The exhibit of the department of Biology next to the left of the alcove has cases of insects and a fine display of mounted Alabama birds. Then comes the exhibit of the department

of Botany and Geology. The exhibit of foreign cottons grown on the College farm, consisting of stalk, leaves, bolls and the cotton, is both novel and instructive. This exhibit attracts unusual notice. Probably no similar exhibit has ever been seen in this country.

In the department of Agriculture there are all kinds of Agricultural products raised in the South, a great variety of seeds put up in jars etc.

The special feature is the Tobacco both in the leaf and in the manufactured form. Experts say these specimens compare favorably with the best tobaccos of Virginia and North Carolina. It is said that even young ladies asked for some of the "Golden Plug," presumably for their sweethearts. The last exhibit is that of the Veterinary Department. This contains several skeletons of domestic animals from Ward's Celebrated Establishment, also fine papier-mache models of the organs of animals in their normal and in diseased conditions, and many other objects of interest too numerous to mention.

This exhibit attracts universal attention and is thronged with visitors. It is a revelation to most visitors, and will doubtless be of great benefit to the College in enlightening the public as to the extensive facilities furnished for higher technical and scientific education. A pleasing attraction is the large sign painted and decorated in college colors, and the tasteful manner in which the exhibits are arranged.

A VISITOR.  
Miss H— (in Latin class): Prof., what is a unicorn?  
Prof: If you had been at the Vanderbilt game, Miss H—, you would have seen in me an excellent example of one.

Y. M. C. A.  
Mr. H. Anderson, the Southern General Secretary of the International Committee of the Y. M. C. A., paid us a visit on Saturday. He has been doing good work for our State Executive Committee, and made quite a favorable impression among the students and others, whose good fortune it was to meet him. It is to be hoped that his work among us will be productive of much fruit, and be shown in an increased interest in our association throughout the remainder of the session.

He informs us that we may receive a visit in the near future from Mr. Brockman and Mr. Willis.

We are glad to say that he found our association in a better condition than it might have been. On the eleventh, at the regular Sunday afternoon meeting the Rev. Mr. Bull, pastor of the Presbyterian church, led the services. His subject was Naaman, the leper's visit to the Prophet, Elsha. In the course of his remarks he brought out many reasons why leprosy was chosen as the type of sin, and also developed Naaman's character, showing his good points as well as his weak, pointing out the importance of having a Christian spirit and faith. Naaman was handsome, rich, of the nobility, being the prime minister, honest, virtuous and possessed almost every good characteristic that we could well wish. But he was a leper. So what matter what a man be if he lacks the one thing, a Christian faith? Bro. Bull is an impressive speaker, and the meeting was highly interesting as well as profitable.

On last Sabbath another interesting meeting was held.

Prof. of History (to class): Where is Mr. D. Walker?  
Member of class (probably Guiteau): Don't know professor.  
Well if he don't look out his name will become Q. Walker.

EXCHANGE COLUMNS.  
THE ORANGE AND BLUE has no regular exchange department. Yet, from time to time a limited number of exchanges will appear in its columns.

Four Colleges and Universities now publish daily papers. — Ex.  
Daniel Webster was editor-in-chief of the first college paper in the United States. It was published at Dartmouth.—Ex.

Who wrote the most, Dickens, Warren or Bulwer? Warren wrote "Now and Then," Bulwer wrote "Night and Morning," Dickens wrote "All the Year Round." — Ex.  
He writeth best, who stealeth best, Ideas great and small, For the great Soul that wrote the first From nature stole them all.—Ex,  
Professor: Have you read "Love's Labor Lost?"  
Student: No, sir. I have read several of Mr. Love's works but never his "Labor Lost?" — Ex.  
Freshman Logic—A lazy boy is better than nothing. Nothing is better than a studious boy. Therefore a lazy boy is better than a studious boy.—Ex.  
Prof. of Psychology: "What is love?"  
Chem. Student: Love is a volatile precipitate, and marriage is a solvent in which it is quickly dissolved." The above is a lye.—Ex.  
For fifty years no smoker has graduated from Howard with the honor of his class.—Ex.  
Ditto our college last commencement, but we can't answer for previous years.

The Vassar girls recently debated on the question: "Resolved, That higher education unfits men for matrimony."—Ex.

We hope by the next issue of THE

ORANGE AND BLUE a greater number of exchanges will be at hand so that this department may be made more interesting.
